Sustainment Enlisted Force

Software Factory Programs AI2C

CURRENT PROJECTS

Our active portfolio, used by Soldiers across the army.

Airborne Ready

Stand up, hook up, and shuffle out the door. Increases the timeliness and accuracy of jump logs to improve readiness for airborne units.

Blast Radius

Rapid, accurate, and tactical ammo storage. Reduces your ammo planning time while meeting standards for above-ground ammo storage.

Carrera

Thousands of active duty roles at your fingertips. Provides National Guard and Reserve Soldiers a streamlined experience for enlisting and applying for active duty roles.

CASL Picker

Reduce manual sorting and increase supply fulfillment. Empowering SDA personnel to provide general and efficient support, improving maximum fulfillment velocity.

COFM

Correlation of Forces and Means Calculator. Enables planners to compare relative combat power against enemy forces during wargaming.

COP TAK

Decision-making fast, accurate, and lethal. Enables fast decision-making by decreasing time spent developing a common operating picture through direct reporting.

Firewire

Informing field artillery effectiveness. Automates and improves National Training Center conventional unit data analysis and insights.

Ice Guardian

Maintain control in the Arctic by ensuring mobility through ice and snow. Quickly assesses the viability of landing through, refueling, and equipment in key Arctic regions.

Kronos

The calendar built for Soldiers. Streamlines your schedule and provides maintainers visibility to bring range training calendars.

LOG TAK

Fast and accurate LOGISTAR reporting. Reduces data error rates, and more accurate LOGISTAR reporting from the lowest echelons to the highest.

Mercury

Sustainment estimates in minutes. Converts your time and more accurate LOGISTAR reporting from the lowest echelons to the highest.

Parts Tracer

Accurate equipment label translations for logistical operations. Enhances internal partner forces cohesion with automated translations.

PMCS

Maintenance made simple. Quick and easy access to Technical Manuals (TM) and Preventive Maintenance Checks & Services (PMCS) information, all from your mobile device.

PZ Ops

Unified situational awareness at the Pickup Zone. TMX plugs to instantly track, manage, and update load estimates during all tactical missions—empowering the task force to answer RFIs and act faster.

TAK Server

Deploy and monitor dispersed CD System. Enables any communication to quickly configure and stand-up a TAK server on a connect-a-client device.

Enterprise Business Systems – Convergence (EBS-C)

A fully funded Army Software Pathway Program

The Army's business modernization and transformation effort providing a modernized warfighting capability that enables integrated and auditable sustainment operations from the strategic support area to the tactical edge of the battlefield, enabling decision making by Soldiers, the civilian workforce, and leaders at echelon.
