LOGPRO

FY25 Battle Lab Experiment

EFFORTS TO SUPPORT THE ARMY OF 2040

2040 MAINTENANCE & RECOVERY LOE

[21-24 OCT 24/18-21 FEB 25] How does Maint and Recovery change in the 2040 FOE [CRC 21]

PREDICTIVE SUSTAINMENT

[27-31 JAN 25] Technical evaluation of how AI and ML can enable predictive sustainment. Focus on data sets, and questions that could be answered by AI or ML [CRC 18, 21]

PULSED SUSTAINMENT

[14-18 JUL 25] Examine the implications of operating in a widely-dispersed area under A2/AD and DDIL conditions that requires infrequent resupply operations. [CRC 18, 19, 21]

SUSTAINMENT AT SCALE IN A2/AD ENVIRONMENT

[OCT 25] Assess the ability to sustain ops in an A2/AD environment when there is significant uncertainty regarding the receipt of sustainment. [CRC 18, 19, 21]

PROJECT CONVERGENCE

is a series of experiments conducted both in CONUS and forward in operational theaters incorporated in US Army Service Component/COCOM exercises designed to assess future concepts and early prototype capabilities in a live field environment. Capstone (PCC5, 6, 7) experiment occurs every 12-18 months.

THINK INSIDE THE BOX

Dvt Logistition

THE CRUCIBLE TRAIN TO WIN

TOP SUSTAINMENT CHALLENGES AT JRTC

- CONCEPT OF SUPPORT AT ECHELON** How are we organizing our trains and CTCs, FPCs, BSA, and DSA to be effective and survivable according to LSCD battlefield geometry?
- SUSTAINMENT SURVIVABILITY** How are we organizing, equipping, and reinforcing our BSAs and DSAs to survive on the enemy's High Payoff Target List with consideration to electromagnetic/heat/noise signature and speed of displacement?
- SUSTAINMENT SYNCHRONIZATION AND EXECUTION** How are we driving consistent and accurate/analog and digital LOG/MED/PER Status reporting at echelon, running effective Maintenance Meetings and SUSTYNCHs, and maintaining a Sustainment Common Operating Picture?
- SOLDIER 10 LEVEL SKILLS** How are we prioritizing warfighting training for our sustainment MOS soldiers such as weapons, fighting position, and range card proficiency, night vision operation, and movement, listening and expertise, and communications competence?
- CONCEPT OF MAINTENANCE** How do we organize maintenance activities and thus equipment, personnel, and repair part availability at echelon, starting at a CTC 1-4km from the FLOT that should be displaceable in Sminutes, and ending at the DSA or BSA Rear beyond 20km from the FLOT with consideration to our CASL, commodity shops, FSR tele-maintenance, and 3D printing?
- MDMP AND TLPs** How do we not skip steps, never accept a directed CDA, and ensure common dissemination of our analog and digital warfighting products to the lowest level while adhering to 1P-2P rules?
- COMMAND POST FUNCTIONS** How do we organize a command post that drives the operations process, suits the commander, and relies on battle staff NCOs with consideration to size, function, and mobility?
- SUSTAINMENT REHEARSALS** How are we executing effective and thoughtful sustainment rehearsals without a script that walks the plan backwards, from the commander's desired end-state to line of departure, while serving as a second wargame for executors?
- SOPS** How good are our SOPS, when was the last time we used them, updated them, rehearsed them, and redistributed them?
- NCO UTILIZATION IN LSCD** How are our NCOs driving reporting from the LACE at the squad to LOGSTAT at the battalion, hammering meeting attendance, staying deeply involved with the MDMP and TLP processes, and inspecting points 1-9?
