

WINTER 2025

PREDICTIVE LOGISTICS: REIMAGINING SUSTAINMENT ON THE 2040 BATTLEFIELD

Army sustainment has always adapted to the changing demands and complexities of combat. As we approach the 2040 battlefield, those changes will occur more rapidly, even exponentially. The proactive approach of predictive logistics, as opposed to the reactive approach of traditional logistics, is needed to prepare the Army and joint forces for what's ahead. The future is now.

FROM THE CHAIR

Chair of *Army Sustainment Professional Bulletin* MG Michelle K. Donahue writes about the importance of the C2 Fix initiative and how it can enhance the communications networks of divisions and brigades. As Army sustainment modernizes to deal with increasingly complex technology, sometimes the technology itself offers solutions.
